Consultancy

A specialised team of field engineers are on hand to offer site surveys as well as a comprehensive advisory service dedicated to assess customer requirements, environmental impact and energy management.

Project Management

Each individual project will have their own designated project co-ordinator to manage the project from initial request to quotations, planning of works through to completion of works.

Infrastructure

All aspects of infrastructure work can be undertaken from design, installation of services, relocation of services and gas mains, installation of meters, housing and all outlet pipe work. This is all dependant on customer requirements.

Meters

A service is available to each individual client to assess and facilitate all metering, pressure and installation requirements.

Gas Boosters and outlet pipe work:

All aspects of outlet pipe work can be undertaken from installation and repair to installation of gas boosters where metering pressures are not adequate.

Gas Service Isolations and meter Removals

Able to facilitate temporary and final service isolations, meter removals and outlet pipework purging.

AMR (Automated Meter Reading)

Corona Energy are in partnership with PULSE 24 Ltd. to provide detailed advice on AMR units, which have the ability to provide not only half hourly reads but the facility to provide accurate energy data which in turn is vital for all aspects of energy management.
